EDUCATION

International Institute of Information Technology Hyderabad (IIITH)

Bachelor of Technology in Computer Science

Hyderabad, India

August 2024 – May 2028 (Present)

Bhashyam College of Education (BCE)

Intermediate (Class XI–XII)

Guntur, India

July 2022 – July 2024

EXPERIENCE

Software Intern (Remote Client Project — NJ Secure)

January 2026 – April 2026

IIITH — ORBIT Cyber Graph MVP

Hyderabad, India

- Built **ORBIT.Node**, a Wazuh-integrated tactical defense module with local knowledge graphs, real-time alert ingestion, and automated action-card generation for incident response
- Implemented **HITL (Human-in-the-Loop)** workflow enabling analysts to approve/reject mitigation actions with trace logging, feedback synchronization, and explainable AI reasoning
- Designed and integrated privacy-aware scanning, subscription-based detection pipelines, and bidirectional sync with ORBIT.Core for strategic threat intelligence mapping

PROJECTS

Felicity Event Management System | *MongoDB, Express.js, React, Node.js, JWT, bcrypt* | [Source](#)

February 2026

- Engineered a MERN-based event platform with RBAC supporting **5+ user roles** for registrations and ticketing across **20+ concurrent events**
- Developed merchandise workflows with payment verification, inventory control, and QR generation handling **500+ transactions**
- Enabled real-time attendance tracking via QR codes with **sub-200ms scan validation** and WebSocket-based forum with moderation for **300+ participants**

Custom Linux Shell (C-Shell) | *C, POSIX API, OS* | [Source](#)

September 2025

- Developed a C-based shell with **10+ custom utilities** for navigation, file listing, and command logging with persistent history across sessions
- Integrated process management using `fork()` and `execvp()` supporting **foreground/background execution**, job control, and **100% signal-safe** termination handling
- Enabled piping and I/O redirection (`<`, `>`, `>>`) for multi-stage command execution across **up to 8 piped stages**

C-Shark Packet Sniffer | *C, libpcap, POSIX, Networking* | [Source](#)

October 2025

- Constructed a terminal-based packet sniffer using `libpcap` for live network capture across **multiple selectable interfaces**
- Architected **5-layer** packet parsing (Ethernet, IPv4/IPv6, ARP, TCP/UDP) with structured protocol decoding at **line-rate speeds**
- Incorporated protocol filtering across **7 protocols** (HTTP, HTTPS, DNS, ARP, TCP, UDP) and session-based packet storage with zero-leak memory management

File Distribution System | *C, POSIX Sockets, Distributed Systems* | [Source](#)

November 2025

- Constructed a distributed document system with clients, a central naming server, and **3+ storage servers** supporting concurrent access from **up to 50 simultaneous clients**
- Implemented **5 core operations** (create, read, write, delete, metadata retrieval) with role-based access control and fault isolation
- Engineered concurrency control using sentence-level locking achieving **parallel read throughput 3× higher** than sequential baseline
- Established client-server communication over TCP with **O(1) file lookup** and efficient request routing via the naming server

ACHIEVEMENTS

JEE Mains 2024: AIR 1487 — top **0.1%** among **1.2 million** candidates

JEE Advanced 2024: AIR 1311 — top **0.1%** among **180,000** candidates

TECHNICAL SKILLS

Languages: Python, C/C++, MySQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, FastAPI

Developer Tools: Git, GitHub, VS Code, Android Studio

Libraries: pandas, NumPy, Matplotlib, Streamlit
